Plastic Products

Flexible Intermediate Bulk Containers (Totes)

Features

- Made to order as per customer specifications
- Flexible and foldable
- Various filling and discharging options available
- Efficient bulk material handling
- Suitable for a variety of applications: agriculture, food industry, chemical, mining, construction and many more
- Available in white and beige colours
- Liners available

MADE FROM
100% NEW
MATERIAL

Benefits

- Helps in minimizing costs associated with spillage and cleaning
- Helps in reducing freight costs and saves warehouse space
- Cost efficient packaging solutions
- Flexible and foldable

Our Plastic Products

Plastic Labels

PETE 1: Polyethylene terephthalate ethylene
Used for manufacturing containers for water, juice, soft drinks, detergents etc.

HDPE 2: High density polyethylene
Used for manufacturing opaque milk and water containers, shampoo bottles, grocery bags etc.

PVC / V 3: Polyvinyl chloride
Used for manufacturing some detergent and cleaner bottles, cling-wraps etc.

LDPE 4: Low density polyethylene
Used for manufacturing grocery bags, wraps, some bottles and containers etc.

PP 5: Polypropylene
Used for manufacturing soup and yogurt containers, straws, plastic cutlery etc.

PS 6: Polystyrene
Used for manufacturing of styrofoam trays, egg trays and containers, disposable cutlery, cups and containers etc.

Other 7: Polycarbonate and bio-based plastics - Used for manufacturing 5-gallon water bottles, sipper cups and bottles, clear plastic cutlery, baby bottles etc.

Usage of Plastic in Food Handling

Safer choice for use in food handling

Avoid

(*Unless specifically labelled)

SAFE

Tips for safer use of plastic in food handling:

1. Only use those plastic products that meet Government regulations on food handling (e.g. CFIA approved)
2. For products that come in contact with food, only use plastic that does not contain recycled content.
3. It is not safe to use plastic containers for microwaving food because the process of heating leads to the release of some chemicals from plastic which could be hazardous.
4. Avoid using plastic containers for storing fatty foods as there is a greater degree of leaching of chemicals into fatty foods.
5. Avoid using cling wraps in the microwave and if you do make sure that the plastic does not touch the food.
6. Always check the plastic label to select safer material for food handling.

T-Shirt Bags/Convenience Bags

Features

- Assembled in rolls, ready to be inserted on racks for easy distribution
- Easy tear-off perforated line enables bags to be separated easily
- CFIA approved, suitable for food handling
- Ideal for produce, bakery, meat and other food material
- Racks available upon request

T-Shirt Bags

- Made of 100% HDPE (high density polyethylene)
- Come with handles for easy carrying option
- Wider gusset to hold more products

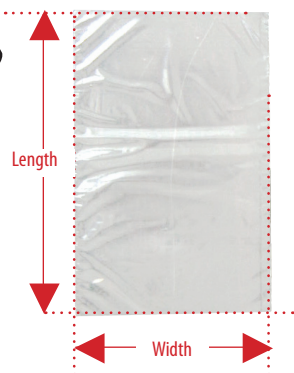

Item #	Size [(Width + Gusset) x Length]	Packaging
30-221	(220 + 130) x 490 mm	8 rolls / case

Convenience Bags

- Made of 100% LDPE (low density polyethylene)
- Superior clarity for better product presentation

Item #	Size (Width x Length)	Thickness	Packaging
46-345-NG	10.5" x 15"	0.55 mil	2 rolls / case
46-365-NG	10.5" x 20"	0.55 mil	2 rolls / case

Custom imprints of logo / design for HDPE and LDPE available

Providing consistent quality products at competitive prices: our priority

Past, Present and Future

Founded in 1996, Vera Plastics, a division of Ronco is a world-class manufacturer of plastic production. Since its inception, Vera Plastics has strived to meet and exceed customers' needs by manufacturing consistent quality products and providing the best service industry-wide. Vera Plastics's head office is in Concord (north of Toronto) and its operations encompass Canada and the Far East. Sales offices all across Canada complement Vera Plastics's presence in the Canadian market. High tech and state of the art manufacturing facilities in China and Malaysia allow

Vera Plastics to manufacture top quality products while remaining competitive. Vera Plastics takes pride in the quality of the people involved at all levels of its operations and ensures that its employees are satisfied with their work and have all the tools they need to be efficient. By creating more value in the workplace, Vera Plastics is able to create more value in the marketplace. Vera Plastics is a customer-focussed company, dedicated to the support and realization of its quality policies, objectives and systems. In order to achieve the company goals, employee training is an important part of Vera Plastics's corporate culture.

Clean & Safe™ Guarantee

Vera Plastics has adopted the principles of the Clean & Safe™ Guarantee. From the storage of the raw material to the delivery of the product to your warehouse, Vera Plastics is committed to maintaining the integrity and hygiene of each of the products it offers.

This Guarantee ensures that products remain sanitary throughout the manufacturing process, including the

- Quality and storage of raw material;
- Handling and transformation at the manufacturing facility; and
- Verification and control of finished product quality

The Guarantee's benefits for you:

With this Guarantee in place, you can be confident that you will receive products that:

- Are hygienic, reduce the risk of contamination;
- Are of consistent quality; and
- Meet and exceed industry standards

Quality Control

To ensure that products delivered to customers comply with the specifications and are of consistent quality, all products undergo strict quality inspections.

- During the manufacturing process, on-line inspections are performed.
- Before shipping the products, Vera Plastics employees conduct a quality inspection of random samples to ensure that products meet specifications.

- At the time of loading it is ensured that the packaging is in good condition.
- A further quality inspection is performed once the goods are received at Vera Plastics warehouse.
- For shipments made directly to the customers, Vera Plastics's quality department coordinates (in consultation with the customer) a quality inspection by representatives across Canada.

Certifications

Vera Plastics is ISO 9001:2008 certified as well as ISO 13485:2003 certified for medical device products. Vera Plastics has successfully obtained "Letters of

Non-Objection" from the CFIA (Canadian Food Inspection Agency) for products that are used in the food processing, manufacturing and service industries.

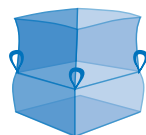

Your satisfaction drives our ambition

Top Design

T1 - Open top: For inner plant storage and transfer

T2 - Duffel top: All purpose use, fits all types of filling equipment

Bottom Design

B1 - Flat bottom: Cost effective design for a single trip

B2 - Full open bottom: For products with critical flow characteristics

B3 - Spout bottom: Protects products, and minimizes spillage & cross contamination

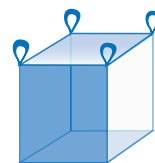

B4 - Cone bottom: For products that bridge or with poor flow valve characteristics

Styles

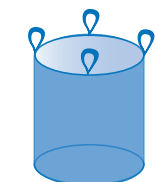

S1 - 4 sided bag

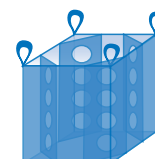

S2 - U panel bag

S3 - Circular woven

S4 - Baffle Bag

Safety First

Customers' safety is of utmost importance to Vera Plastics. Vera Plastics' Clean & Safe™ programme ensures that proper raw material is used in the manufacture of the totes and the cleanliness of product is also approved for food handling. Vera Plastics has gone one step further by providing a safety ratio test report on each lot sent to the customers. Vera Plastics' well rounded quality programme is tailored to ensure user safety from operators to the end users. Working with Vera Plastics will bring you Peace of Mind.
